

HANDHELD PIN BONE REMOVER

Remove fish bone.
Reduce waste.

Innovative, handheld pin bone remover

Optimise yield and reduce waste in pin boning with the handheld pin bone remover without damaging the fillet.

The innovative, handheld pin bone remover is optimal for the manual inspection table or for small processing environments that do not have the capacity for automatic machines. It can also be used as an inspection tool in large factories for removing remaining pin bones after automatic removal.

The handheld pin bone remover is small and compact, and it can be used for several fish species.

Technology

The handheld pin bone remover is made in stainless steel.

Technical specifications
