

LIFT SYSTEM

Ergonomic de-palleting.
Ensuring working conditions.

Customised lift system

Ergonomic de-palleting of boxes or racks for a proper working height. The lift system can be used for lifting of e.g. racks and boxes on pallets.

The pallets can be in-fed with a manual lifting truck from floor position or lift the boxes from a platform to a lifting truck.

The lifting system can be provided with a safety cover.

The lift system is customised according to need.

Technical specifications

Lifting capacity	1000 kg*
Dimensions (LxWxH)	Customised*
