

FILLET WASHER 700

Fillets washed.
Fully automatic machines.

The fully automatic fillet washer

The Fillet washer 700 is a fully automatic fillet and fish washer for removal of slime and bacteria from processed fillets.

The machine is suitable for use when the fillet has been trimmed and before packing or smoking. By washing the fillets, the end-product is clean and ready for packaging.

Options

- Blowing unit
- Pump unit
- Chemical dosing unit
- Water saving system
- Pump for recirculation of water
