

Skinning machine V1688

FOR WHITEFISH

Automatic double-lane skinning for high capacity

Silver skinning of small and medium-sized fillets

Skinning machine V1688

The Skinning machine is designed to process small and medium size fillets from various white fish types.

The skinning machine is made for the purpose of leaving as much silver on the fillet as possible.

Technology

The machine has two pressing rollers that make it possible to process two fillets at the same time.

The automatic skinning machine can be provided with only one pressing roller to be used as a single lane skinning machine.
