

ICE DOSER

Automating ice dosing.
Accommodating needs.

Automatic dosing of ice

The ice doser is built for automatic filling of ice into boxes with fish.

The machine is built in a strong stainless-steel construction, and all parts used are made in FDA approved materials.

The ice doser has an ice buffer with a volume of 1.5 m³. It can be customised to accommodate your specific needs.

Technology

The ice doser consists of a conveyor that transports the ice from the ice doser tank to the boxes, a dripping tray that ensures ice will not end up on the floor, and a system for automatic dosing.

Options

- Conveyor to transport boxes to and from the Ice Doser

Technical specifications

Capacity	500 doses/hour
Power connection	3 x 400 V + PE, 50 Hz*
Power consumption	3 kW

* Please contact our sales team for other power connection possibilities
